LETTER OF RECOMMENDATION

To Whom It May Concern,

I am pleased to recommend Mr. Kartavya Mahesh Suryawanshi for a research internship or research assistant position in the areas of Deep Learning, Artificial Intelligence, Computer Vision, and Medical Image Processing. I have known Kartavya as a student in my Deep Learning course at the Indian Institute of Technology Mandi and, subsequently, as a research collaborator whom I currently supervise.

Kartavya is currently working with me on research in **medical image reconstruction and analysis**, through which he has gained experience with several important stages of the research process. His work involves **data processing and preparation, computational experimentation, model development and evaluation, analysis of experimental results, and iterative refinement of approaches**. He has demonstrated the ability to understand an open-ended research problem, investigate relevant methods, implement and evaluate solutions, and respond constructively to feedback. We are currently working together on a **research manuscript**, and I have found him to be a responsible and committed contributor to this work.

His academic performance provides further evidence of his technical ability. In my Deep Learning course, Kartavya received **10/10, the highest course grade**, representing an excellent level of academic performance. He demonstrated a strong understanding of the underlying concepts as well as the ability to apply them systematically to practical problems.

As part of the same course, Kartavya worked with his team on a project concerning **deepfake audio and audio-spoofing detection**. Their solution was the **best-performing project among the course teams** and was evaluated by judges and researchers from **HCLTech**. This project demonstrated his ability to work with real-world data, develop a machine learning solution, and evaluate a model in a competitive project setting.

Beyond his technical skills, Kartavya is an independent learner who works well with supervision and responds positively to critical feedback. His current research involvement has given me confidence in his ability to contribute to a research group and to develop further as an independent researcher.

I therefore recommend Kartavya **without reservation** for a research internship or research assistant position. I believe he would be a motivated and capable member of a research team, and I am confident that he would approach research with diligence, intellectual curiosity, and professionalism.

Please feel free to contact me should you require any further information regarding his academic or research experience.

Sincerely,

Dr. Aditya Nigam

Associate Professor

School of Computing and Electrical Engineering (SCEE)

Indian Institute of Technology, Mandi
